Telecall - Rome 71.4 re [redacted] Electronic Optical Rectifier! STAT

Talked to [redacted] - who in turn transferred me to [redacted] Project Monitor on EOR. STAT
STAT

Rome buying 3 with option for fourth inst. Two for ACIC, 5/20ms & one for GIMPADA. Option for fourth is up to GIMPADA. Around [redacted] STAT

Instrument is tape driven under servo control. Tape is read by decoder which controls machine. They are requiring more reliability in the decoder package than the original model had. Full frame rectifier - 9x9" input - 36" x 36" output capability w/ up to 5x magnification.

Lesson will send copy of exhibit (work statement) and other pertinent info.

Settle.
